SUMMARY

I am a passionate full-stack web developer with over 3+ years of experience in Laravel and 1+ year in the MERN stack. Currently working as a Senior Developer at Softexel Technologies, I specialize in building scalable web applications, RESTful APIs, and seamless frontend/backend integrations. I love turning business logic into clean, high-performing code.

EXPERIENCE

Senior Developer

Softexel Technologies – Remote

January 2023- Now

At Softexel Technologies, I am responsible for building and maintaining robust web applications using both Laravel and the MERN stack. I work on real-time features using Livewire, Alpine.js, and Tailwind CSS. Alongside Laravel projects, I actively contribute to Vue.js and React.js applications, helping design efficient database structures, resolving critical bugs, and coordinating with junior developers to ensure smooth project delivery and code quality.

WORK SAMPLES

Popular Projects:

- [mobiledokan.com](#) – Mobile comparison, specs, and reviews
- [mobilemaya.com](#) – User-centric mobile information platform

Recent Projects:

- [kuhely.com](#) – Full-stack multivendor e-commerce platform built with Laravel
- [Laravel security packages](#) – Built custom packages to detect & prevent common vulnerabilities

PROJECT PORTFOLIO OVERVIEW

Over the years, I've worked on 40+ e-commerce platforms, built POS systems, developed AI-powered chatbots using OpenAI's fine-tuned models, and created scalable platforms for real estate, online booking, affiliate marketing, and various other business domains. My work spans custom web apps, Laravel packages, and API-first architectures – serving both startups and enterprise-grade clients.
